Activity and Privacy Masking Zones

We provide you with the feature to easily identify the person who knocked on your door, sending you their picture within seconds in a smooth and seamless manner.

We provide you with complete control over your curtains, with the ability to schedule automatic opening and closing without manual intervention, either through the app or via voice commands with Alexa.

Precise Positioning of Curtains
Adopt Hall circuit to detect the direction of the motor, so as to make curtain stop exactly where you want.

Support to Pull 8kg Curtains
The powerful speed of the motor can easily pull the 8kg curtain at a constant speed.

Stable Remote Control
You can use multiple remotes to control one Curtain motor, or one remote to control multiple Curtain motors. Stable and convenient.

Manual Start or Pause
We collected the data of the curtain movement process, calculated the voltage curve when the curtain is running. Gently pull the curtain to open automatically and stop at any time.

We offer you smart solutions to protect your privacy in the bedroom and private areas, through smart control, voice commands with Alexa, and opening with a secret code.

We offer you the luxury of listening to music through a Bluetooth-powered speaker with attractive, distinctive colors that enhance relaxation and create a luxurious ambiance.

We offer you modern digital clocks with both day and night lighting, equipped with a timer for added comfort and luxury.

We present to you smart touch less water faucets with temperature display, adding luxury and a unique look to your kitchen.
